1. Siarad is a Text-to-Speech tool. Suggest using it to read your draft documents to you, so you can determine if the document's content flows well.
2. Diff SxS compares documents in a side-by-side comparison and generates a report that can easily be shared with co-workers.
3. AcroSeeker™ is a free tool by Atebion LLC that identifies and verifies acronyms in a selected document.
4. Setting provides customization for specified capabilities, such as the Find Instructions & Questions parameters.
